Master's Thesis:

Organization and Information Flow Analysis

Background

We are doing a shift moving from a project organization to product organization. In that change, we need to adapt our organization and information flow setup, in order to continue being effective and stay competitive.

Objective

The main objective of the master's thesis is to

- Analyze information flow / exchange between functions, and identify gaps and bottlenecks
- Suggest improvements in organization and information flow setup, in terms of functional responsibilities, roles, areas of digitalization, communication tools, mandate, etc.
- Suggest major areas for change to shift from a project organization to a product organization

Application

Prerequisites: Engineer within Production and/or Logistics.

For more information, contact Head of Planning Johannes Jonsson (+46 76 2138356) and logistics developer Suhasini Chandrasekharan (+46736405675)

Scope: 30 HP
